To Whom It May Concern:

Please accept this recommendation on behalf of FORM Studios, Inc. and ABP Development, LLC. This team of highly skilled architects and general contractors performed exceptionally on our Kingdom Life Center project in Frisco, TX. The project was a ground-up building project, including all site work and paving, to complete our Phase 1 of a multi-phase project for our campus at 12330 Rolater Road in Frisco. As a Design/Build provider, FORM and ABP brought a fluid as well as a technological cost-saving building approach to our project. We could make ongoing changes throughout the project without the angst associated with traditional architect/contractor construction projects.

I have been involved in multiple large building projects throughout my career as a pastor leader and civil servant. I have never had a team work so closely with my team during this building process. Any and all concerns along the way were received and responded to by FORM & ABP. Additionally, the integrity of the financial billings, records, and documentation of all expenditures was the best I have ever experienced in the construction community. All billings were documented with receipts and itemized on the budget each month. The honesty and integrity of this company is beyond reproach.

We have future projects on the drawing board at Kingdom Life. I have no other plans but to contract with FORM and ABP for all of them. I highly recommend this team to you.

Feel free to contact me for any additional inquiries.

Kind regards,

A handwritten signature in black ink that reads "Larry L. Burden". The signature is fluid and cursive, with the first letters of each word being capitalized and prominent.
